Preparing for Use

WARNING: Do not attempt to assemble parts inside the Rotisserie while it is plugged in or hot. Burns or other serious injuries can occur.

Before Using Rotisserie for the First Time
Before using your Baby George™ Rotisserie for the first time, wash all accessories with hot, soapy water. Rinse all parts well and dry thoroughly. Be sure the Rotisserie is unplugged and use a damp cloth or sponge to wipe down the inside and outside of the Rotisserie.

CAUTION: Never immerse the Rotisserie in water or any other liquid!

Prepare Food
We recommend preparing the food to be cooked before proceeding with any Rotisserie assembly. Cut all vegetables to be cooked or prepare a homemade marinade for extra flavor (see "Recipes" for information about Marinades and Rubs). If necessary, store food in refrigerator while preparing Rotisserie.

Before placing any items to be cooked onto the Rotisserie Bar Assembly or Adjustable Flat Basket, we suggest familiarizing yourself with how the Rotisserie operates and how each accessory is assembled and used in the Rotisserie.

Rotisserie Bar Assembly
1. Locate the Rotisserie Bar Assembly.
2. The Rotisserie Bar assembly consists of two End Wheels. One End Wheel (N) has a gear, center bar and two meat tines attached to it. The other End Wheel (M) has two meat tines and a Thumb Screw locking device.
3. Loosen the Thumb Screw and pull the End Wheel off the center bar of the Rotisserie Bar Assembly. Carefully slide the food to be cooked onto the center bar and meat tines of the geared End Wheel.
4. Once the food is in place, align the End Wheel with the center bar of the Rotisserie Bar Assembly. Push the End Wheel with Thumb Screw toward the geared End wheel as far as possible. Tighten the Thumb Screw to lock the End Wheel in place.
Preparation for Use (Cont.)

5. **WITHOUT TURNING THE ROTISSERIE ON YET,** use the Cover Handles to raise the Cover.

6. Hold the Rotisserie Bar Assembly so the End Wheel with the gear faces to the right. Slide the Rotisserie Bar into the Rotisserie along the Rotisserie Bar Assembly Track. See Figure 1. Make sure each end of the center Bar Assembly drops into the center grooves of the Rotisserie Bar Track.

Assemble Drip Tray

1. If not in place, slide Drip Tray into position, as shown in Figure 2.

Insert Reflector

1. Grasp the Handle and slide the Reflector behind the Heating Elements. See Figure 3. Make sure the notches hook over the Heating Element brackets. The bottom of the Reflector must angle over the Drip Tray.

A Little About Marinades and Rubs

Marinades tenderize, add flavor and moisten all kinds of foods. To keep beef, fish and chicken flavorful and juicy, a marinade is crucial. There are three basic ingredients in most marinades. Acids (vinegar, citrus, etc.), oils and spices. The acids tenderize, the oils moisten, and the spices add the flavor.

The amount of time a food marinates depends on the flavor and texture of that food. For example, fish should only marinate for up to 30 minutes or less, while a steak should marinate for a couple of hours or more.

While foods are marinating, they should be kept refrigerated. It is best to remove the food and bring back to room temperature before cooking. **NOTE:** Do not allow raw or uncooked meats to stand at room temperature for extended periods of time.

Extra flavor can be added to meats by rubbing with your choice of spices and herbs. This is called a dry rub. Before cooking, rub the food with spice and herb mixture and it is ready to cook. Common examples of spice rubs are cracked peppercorn, garlic, or rosemary.

Rub

Any spice or herb can be used for a dry rub on virtually any kind of meat: roasts, chicken, steaks, and fish. These, of course, are just suggestions. The possibilities for rubs are endless...

Here are some examples:

**Red Meat Rub**

1 Tablespoon cracked peppercorn
2-4 Tablespoons salt
2-4 cloves minced garlic
1 Tablespoon rosemary
1 Tablespoon paprika

**Fish Rub**

1 Tablespoon dried basil
1 teaspoon salt
1 teaspoon pepper
pinch paprika
User Maintenance Instructions

WARNING: Do not attempt to disassemble or clean the unit while it is plugged in and/or is hot. Burns or other serious injuries can occur.

Your Baby George™ Rotisserie requires little maintenance. It contains no user-serviceable parts inside the Rotisserie. Contact consumer service if the product requires servicing.

CAUTION: Unplug appliance from wall outlet and allow all parts to cool completely before cleaning.

CAUTION: Do not use metal or abrasive scouring pads or harsh or abrasive cleansers to clean the parts of the Rotisserie. If necessary, use a nylon bristle brush to loosen hardened food particles.

1. Once product is unplugged and has cooled completely, carefully pull out Drip Tray. Use care not to spill any liquids as they may still be hot.
2. Remove all accessories from Rotisserie. Wash all accessories in hot, soapy water. Rinse well and dry thoroughly.
3. Wipe outside of Rotisserie with a damp cloth or sponge. Dry with a soft cloth.
4. Lift open Cover. If desired and to make cleaning easier, you may also lift open the Cover completely, then pull up and remove Cover to release from tracks. USING THE ACCESSORIES

ADJUSTABLE FLAT BASKET

1. Squeeze the two metal tabs on the Adjustable Flat Basket Cover and remove. See Figure 4. Set Cover aside.
2. Place food into Basket. Place food flat; do not “stack” food.
3. Replace Basket Cover so it fits TIGHTLY against food. (The Cover will "hold" the food in place as it turns. The cover can be adjusted up or down to accommodate the thickness of the food. See Figure 5.
4. WITHOUT TURNING THE ROTISSERIE ON YET, use the Cover Handles to raise the Cover.
5. Hold the Adjustable Basket Assembly so the small gear faces to the right. Slide it into the Rotisserie along the Rotisserie Bar Assembly Track. Make sure each end of the Adjustable Basket Assembly drops into the center grooves of the Rotisserie Bar Track.
Hints and Tips

CAUTION: Always protect hands with oven mitts when handling hot Rotisserie parts!

- Do not place Rotisserie underneath cabinets or on a tablecloth during use.
- Times given in Cooking Chart are suggestions.
- Before beginning the full roasting process, turn the Timer Control to a minimum setting to let the machine rotate a few times with meat in place. Be sure the meat rotates freely and does not hit the Heating Element when it rotates. Turn Timer Control to “OFF.” If the meat does hit the Heating Element, remove food and tie the food with cooking string or you may need to cut the meat down in size slightly.
- Do not cover food while it is cooking in the Rotisserie.
- Do not attempt to cook food in the Rotisserie without the Cover in place and closed.
- When cooking fatty foods (duck, etc.), check Drip Tray often to be sure the drippings do not overflow.
- When large cuts of meat are finished roasting, let it sit for 15-20 minutes to let the cooking process complete and to allow the juices to settle before carving.
- Make sure to use oven mitts or hot pads when removing the Rotisserie Bar Assembly with (or without) the Rotisserie Remover.
- Place 1 pound of hot dogs flat on work surface with sides touching. Measure approximately 1-inch from edge of hot dogs and push Skewer through all hot dogs. Measure approximately 2 1/2-inches over from Skewer in hot dogs and push second Skewer through. Place Skewers onto Rotisserie Bar Assembly. Repeat for second pound of hot dogs.
NOTE: When using this product for the first time, you may notice a slight odor and a small amount of smoke. This is normal and will dissipate in a short amount of time.

1. Use Cover Handles to lift open Cover.
2. Prepare food, Rotisserie Bar Assembly and accessories as instructed in “Preparing for Use.”
3. Close Cover.
4. Be sure Drip Tray is in place and properly positioned beneath Reflector. (See “Preparing for Use.”)
5. Plug the Rotisserie into a polarized 120V, 60 Hz household electrical outlet.
6. Once the Rotisserie is plugged in, you may begin operation by turning the Timer Control to the desired cooking time.

NOTE: The Timer Control is adjustable anywhere between 15 minutes and 3 hours (180 minutes).

As soon as the Timer Control is turned to a time setting, the Rotisserie motor will begin turning and the Heating Element will turn on.

Allow the food to cook for the desired length of time. The food will cook only for as long as the Timer is set. When the time elapses, the Timer will sound a loud “ding” and the Rotisserie will turn off (both the Heating Element and the Motor).

7. Once food is cooked and the Rotisserie is off, unplug the Rotisserie from the electrical outlet. Allow the Rotisserie and cooked food to sit 15-20 minutes.

CAUTION: Always unplug Rotisserie before removing food. DO NOT carve meat while it is in the Rotisserie.

8. **Protect your hands with oven mitts** and use the Rotisserie Remover to remove the Rotisserie Bar Assembly from the Rotisserie.

9. Squeeze the handle and place the Rotisserie Remover on the inside of the End Wheels, lift up and out of the Rotisserie. See Figure 8.

**CAUTION:** Always **protect hands with oven mitts when handling hot Rotisserie parts or when removing food from Rotisserie.**

10. To remove the food from the Rotisserie Bar Assembly, loosen the thumb screw on the End Wheel and pull it off the center bar. **Carefully** remove food from Rotisserie Bar Assembly.

### HELPFUL HINTS WHEN COOKING LARGER CUTS OF MEAT WITH A HIGHER FAT CONTENT:

- Cook large cuts of meats only on the Rotisserie Bar Assembly; cook slabs of meat in the Adjustable Flat Basket.
- Trim off all excess fat from meat before cooking in the Rotisserie.
- Remove all grease residue from the cooled Heating Elements.
- Cook beef and pork until meat thermometer reads 145°F for medium rare, beef only, and 170°F for well done.

### Cooking Chart

The following times are meant to be used as guidelines only. Times will vary due to the cut or thickness of the meat being cooked. To be sure that the food is truly done, use a cooking thermometer. If the food does need more time to cook, reset the timer and check periodically so you do not over cook.

NOTE: When using this product for the first time, you may notice a slight odor and a small amount of smoke. This is normal and will dissipate in a short amount of time.

1. Use Cover Handles to lift open Cover.
2. Prepare food, Rotisserie Bar Assembly and accessories as instructed in “Preparing for Use.”
3. Close Cover.
4. Be sure Drip Tray is in place and properly positioned beneath Reflector. (See “Preparing for Use.”)
5. Plug the Rotisserie into a polarized 120V, 60 Hz household electrical outlet.
6. Once the Rotisserie is plugged in, you may begin operation by turning the Timer Control to the desired cooking time.
   
   **NOTE:** The Timer Control is adjustable anywhere between 15 minutes and 3 hours (180 minutes).

   As soon as the Timer Control is turned to a time setting, the Rotisserie motor will begin turning and the Heating Element will turn on.

   Allow the food to cook for the desired length of time. The food will cook only for as long as the Timer is set. When the time elapses, the Timer will sound a loud “ding” and the Rotisserie will turn off (both the Heating Element and the Motor).

7. Once food is cooked and the Rotisserie is off, unplug the Rotisserie from the electrical outlet. Allow the Rotisserie and cooked food to sit 15-20 minutes.

   **CAUTION:** Always unplug Rotisserie before removing food. DO NOT carve meat while it is in the Rotisserie.

Preparation for Use (Cont.)

Skewers

NOTE: Use Skewers with the Rotisserie Bar Assembly only. Do not attempt to use Skewers in any other manner.

1. Load food onto the skewers.
2. Place the End Wheel with Thumb Screw onto the center bar of the Rotisserie Bar Assembly. Align the locking device on the End Wheel with the guide lines on the center bar of the Rotisserie Bar Assembly. Tighten thumb screw to lock in place.
3. Hold one Skewer with the hooked end of the Skewer facing to the left. Place the Skewer in a notched cut out in the End Wheel with Thumb Screw and align the tip of Skewer with the hole in the raised tab on the End Wheel (with gear).
4. Squeeze and press down on the top of the Skewer until it snaps firmly into place. See Figure 7. Repeat for remaining Skewers.
5. WITHOUT TURNING THE ROTISSERIE ON YET, use the Cover Handles to raise the Cover.
6. Hold the Rotisserie Bar Assembly so the End Wheel with the gear faces to the right. Slide the Rotisserie Bar into the Rotisserie along the Rotisserie Bar Assembly Track. Make sure each end of the Rotisserie Bar Assembly drops into the center grooves of the Rotisserie Bar Track.

PLEASE NOTE: The USDA recommends that meats such as beef and lamb, etc. should be cooked to an internal temperature of 145°F. Pork should be cooked to an internal temperature of 160°F and poultry products should be cooked to an internal temperature of 170°F-180°F to be sure any harmful bacteria has been killed. When reheating meat/poultry products, they should also be cooked to an internal temperature of 165°F.

Hints and Tips

CAUTION: Always protect hands with oven mitts when handling hot Rotisserie parts!

- Do not place Rotisserie underneath cabinets or on a tablecloth during use.
- Times given in Cooking Chart are suggestions.
- Before beginning the full roasting process, turn the Timer Control to a minimum setting to let the machine rotate a few times with meat in place. Be sure the meat rotates freely and does not hit the Heating Element when it rotates. Turn Timer Control to “OFF.” If the meat does hit the Heating Element, remove food and tie the food with cooking string or you may need to cut the meat down in size slightly.
- Do not cover food while it is cooking in the Rotisserie.
- Do not attempt to cook food in the Rotisserie without the Cover in place and closed.
- When cooking fatty foods (duck, etc.), check Drip Tray often to be sure the drippings do not overflow.
- When large cuts of meat are finished roasting, let it sit for 15-20 minutes to let the cooking process complete and to allow the juices to settle before carving.
- Make sure to use oven mitts or hot pads when removing the Rotisserie Bar Assembly with (or without) the Rotisserie Remover.
- Place 1 pound of hot dogs flat on work surface with sides touching. Measure approximately 1-inch from edge of hot dogs and push Skewer through all hot dogs. Measure approximately 2 1/2-inches over from Skewer in hot dogs and push second Skewer through. Place Skewers onto Rotisserie Bar Assembly. Repeat for second pound of hot dogs.
Using the accessories

Adjustable Flat Basket

1. Squeeze the two metal tabs on the Adjustable Flat Basket Cover and remove. See Figure 4. Set Cover aside.

2. Place food into Basket. Place food flat; do not “stack” food.

3. Replace Basket Cover so it fits TIGHTLY against food. The Cover will "hold" the food in place as it turns. The cover can be adjusted up or down to accommodate the thickness of the food. See Figure 5.

4. WITHOUT TURNING THE ROTISSERIE ON YET, use the Cover Handles to raise the Cover.

5. Hold the Adjustable Basket Assembly so the small gear faces to the right. Slide it into the Rotisserie along the Rotisserie Bar Assembly Track. Make sure each end of the Adjustable Basket Assembly drops into the center grooves of the Rotisserie Bar Track.
Preparing for Use (Cont.)

5. WITHOUT TURNING THE ROTISSERIE ON YET, use the Cover Handles to raise the Cover.

6. Hold the Rotisserie Bar Assembly so the End Wheel with the gear faces to the right. Slide the Rotisserie Bar into the Rotisserie along the Rotisserie Bar Assembly Track. See Figure 1. Make sure each end of the center Bar Assembly drops into the center grooves of the Rotisserie Bar Track.

Assemble Drip Tray
1. If not in place, slide Drip Tray into position, as shown in Figure 2.

Insert Reflector
1. Grasp the Handle and slide the Reflector behind the Heating Elements. See Figure 3. Make sure the notches hook over the Heating Element brackets. The bottom of the Reflector must angle over the Drip Tray.

Recipes

Recipes indicated by asterisk (*) are adapted from the George Foreman's Big George Rotisserie Cookbook by George Foreman and Connie Merydith Pascoe Publishing ©Salton, Inc. 1999.

A Little About Marinades and Rubs

Marinades tenderize, add flavor and moisten all kinds of foods. To keep beef, fish and chicken flavorful and juicy, a marinade is crucial. There are three basic ingredients in most marinades. Acids (vinegar, citrus, etc.), oils and spices. The acids tenderize, the oils moisten, and the spices add the flavor.

The amount of time a food marinates depends on the flavor and texture of that food. For example, fish should only marinate for up to 30 minutes or less, while a steak should marinate for a couple of hours or more.

While foods are marinating, they should be kept refrigerated. It is best to remove the food and bring back to room temperature before cooking. NOTE: Do not allow raw or uncooked meats to stand at room temperature for extended periods of time.

Extra flavor can be added to meats by rubbing with your choice of spices and herbs. This is called a dry rub. Before cooking, rub the food with spice and herb mixture and it is ready to cook. Common examples of spice rubs are cracked peppercorn, garlic, or rosemary.

Rubs

Any spice or herb can be used for a dry rub on virtually any kind of meat: roasts, chicken, steaks, and fish. These, of course, are just suggestions. The possibilities for rubs are endless...

Here are some examples:

Red Meat Rub
1. Tablespoon cracked peppercorn
2. Tablespoons salt
2-4 cloves minced garlic
1 Tablespoon rosemary
1 Tablespoon paprika

Fish Rub
1. Tablespoon dried basil
1 teaspoon salt
1 teaspoon pepper
pinch paprika
WARNING: Do not attempt to assemble parts inside the Rotisserie while it is plugged in or hot. Burns or other serious injuries can occur.

Before Using Rotisserie for the First Time
Before using your Baby George™ Rotisserie for the first time, wash all accessories with hot, soapy water. Rinse all parts well and dry thoroughly. Be sure the Rotisserie is unplugged and use a damp cloth or sponge to wipe down the inside and outside of the Rotisserie.

CAUTION: Never immerse the Rotisserie in water or any other liquid!

Prepare Food
We recommend preparing the food to be cooked before proceeding with any Rotisserie assembly. Cut all vegetables to be cooked or prepare a homemade marinade for extra flavor (see “Recipes” for information about Marinades and Rubs). If necessary, store food in refrigerator while preparing Rotisserie.

Before placing any items to be cooked onto the Rotisserie Bar Assembly or Adjustable Flat Basket, we suggest familiarizing yourself with how the Rotisserie operates and how each accessory is assembled and used in the Rotisserie.

Rotisserie Bar Assembly
1. Locate the Rotisserie Bar Assembly.
2. The Rotisserie Bar assembly consists of two End Wheels. One End Wheel (N) has a gear, center bar and two meat tines attached to it. The other End Wheel (M) has two meat tines and a Thumb Screw locking device.
3. Loosen the Thumb Screw and pull the End Wheel off the center bar of the Rotisserie Bar Assembly. Carefully slide the food to be cooked onto the center bar and meat tines of the geared End Wheel.
4. Once the food is in place, align the End Wheel with the center bar of the Rotisserie Bar Assembly. Push the End Wheel with Thumb Screw toward the geared End wheel as far as possible. Tighten the Thumb Screw to lock the End Wheel in place.

Chicken Rub
1 Tablespoon pepper or cracked peppercorn
2-4 Tablespoons salt

Complete with all the accessories you’ll need, your Baby George™ Rotisserie allows you to cook anything from delicate fish or vegetables to poultry items and hamburgers! Cook fish or hamburgers in the Adjustable Flat Basket and roasts or poultry on the Rotisserie Bar Assembly. Any way you cook it—it’s healthy and delicious!

**Rotisserie**

Foods which are cooked on a Rotisserie are extra flavorful, because they are self-basted with their own juices. Foods are more healthful as fat can drip down, away from the food during cooking.

Carefully center food (especially food with a bone in it) on the Rotisserie Bar Assembly, as unbalanced food will cause a jerking motion during cooking. This causes undue stress on the Motor. Adjust food as necessary.

No food should touch the Heating Element or walls of the unit. Use cooking string to tie all poultry; some meats also require tying. Trim food if necessary.

Before cooking poultry, clean inside of cavity removing giblets and neck, then tie bird with cooking string. Secure legs together with string and secure with a knot. Or, use the legs-ties that may come on the bird. Next, truss the thighs by wrapping string around the largest part of the thigh and secure with a knot. Wrap string around breast securing wings snugly next to body of bird and secure with a knot. Cut off excess string. Refer to the "Cooking Chart" for maximum size of food.
